

# NOW TAKING BETS

You can never know what will happen in life. Ain't that true. About 5% of the people aged between 15 and 29 are socially excluded. One of these twenty kids will grow up to become socially excluded. Who are you going to place your bet on? Don't be shy. I mean, the odds here are far greater than in a normal lottery. No? Well.

The HelsinkiMissio's Voima project focuses on mental and physical wellbeing among Finnish youth who are at risk of social exclusion. Support our work by donating us and you're helping us to rise the odds for a better future for those, who need a little bit help with it.
